

**NEW
EVEREST**

New Everest is a forward-thinking distributor of indie games, specifically curated for a senior audience. The brand identity bridges the gap between high-stakes adventure and approachable reliability. By combining a "brave" visual language with a "gentle" execution, we have created an identity that feels both heroic and accessible. Designed for high visibility on vehicle liveries, this brand mark ensures New Everest stands out in local communities as a trusted source of affordable entertainment.

The **New Everest** icon is a custom-engineered lettermark that serves as the visual cornerstone of the brand. It meticulously weaves together the following elements:

- 1. The Initials:** A seamless integration of the letters "N" and "E", representing the company's name with structural integrity.
- 2. The Summit:** The negative space and upward angles capture the silhouette of a mountain peak, a direct nod to the majesty of Mount Everest.
- 3. The Upward Arrow:** A subtle, integrated arrow pointing toward the top, symbolizing forward momentum, encouragement, and the "bravery" inherent in the indie gaming spirit.

To complement the geometric precision of the lettermark, we have selected **Bowlby One SC** as the primary typeface.

- **Character:** The heavy weight and rounded corners of this font evoke a sense of rugged bravery, giving the brand a "heroic" presence that is easy to read at a distance.
- **Targeted Appeal:** The typeface's clear, substantial letterforms provide excellent legibility for our target senior demographic, ensuring the brand remains approachable and "gentle" even in its boldness.

BOWLBY ONE SC
